

Dayoung In

408-499-5885 | dain@ucsd.edu | Santa Clara, CA
github.com/dayoungin99 | linkedin.com/in/dayoungin

EDUCATION

University of California San Diego, San Diego, CA Expected June 2027
Bachelor of Science, Data Science | GPA 3.82/4.00
Coursework: Python, Data Structures & Algorithms, Data Visualization, Database, SQL, Machine Learning

De Anza College, Cupertino, CA June 2025
Associate in Science, Mathematics | GPA 4.00/4.00

SKILLS

Languages: Python, SQL, C/C++, JavaScript
Frameworks: Pandas, NumPy, Matplotlib, Scikit-learn, GeoPandas
Tools & Environments: VS Code, Jupyter Notebook, Git/GitHub, Excel, Eclipse, Google Colab, Linux (Ubuntu)
Web: HTML, CSS

EXPERIENCE

Data Scientist Summer Intern (Team Leader) June 2026 – September 2026
Automated Valuation Model Project | IDX Exchange

- Developed an **Automated Valuation Model (AVM)** to predict California single-family home closing prices using **186K+ MLS transaction records**.
- Engineered property and geospatial features and evaluated **Linear Regression, Random Forest, Extra Trees, and HistGradientBoosting** models using Python, scikit-learn, and GeoPandas.
- Improved test **R² from 0.801 to 0.822** and reduced **RMSE from \$685K to \$649K** through feature selection and hyperparameter tuning.

PROJECTS

Broadband Coverage vs Health Outcomes Analysis January 2026 – March 2026
Data Science Course Project | UC San Diego, San Diego, CA

- Integrated and cleaned FCC and CDC county-level datasets using **Python/pandas**, conducting EDA and correlation analysis on broadband and health outcomes.
- Implemented and evaluated models including **Linear Regression, Ridge/Lasso, and Random Forest**.
- Applied PCA and feature engineering to improve model performance and stability.

Development of Motion Estimation Model August 2022 - December 2022
Undergraduate Research Project, Co-author | Sangmyung University, Cheonan, South Korea

- Developed and optimized **CNN and RL-based** models for human motion recognition, expanding joint key points from **15 to 18** to improve real-time motion stability.
- Co-authored and presented the paper at the 2022 Korean Institute of Electrical Engineers (KIEE) Fall Conference; **published** in conference proceedings ([DBpia](#)).

HONORS AND AWARDS

Bucheon Fantasia Robot Festival October 2022

- Grand Prize - Humanoid Dance Performance (Solo):** Built and programmed a humanoid robot, designing motion sequences and timing control for real-time autonomous choreography.
- Gold Prize - Humanoid Running Warrior (Solo):** Developed robot hardware and implemented running and balance control motions for autonomous performance.

FIRA SimulCup August 2022

- Second Prize - Humanoid Archery (Team Leader):** Designed and programmed robot motions, integrated real-time camera aiming, and collaborated with the Arduino team to modify code.

LEADERSHIP & COMMUNITY INVOLVEMENT

Silicon Valley Korean School, Cupertino, CA August 2024 - May 2025
Volunteer Teaching Assistant

- Assisted various instructors each week in a weekend program serving 1,200+ students by grading assignments, helping 20+ children stay engaged, and supporting special classes such as art and coding.
