EDUCATION

University of California San Diego, San Diego, CA

Expected June 2027

Bachelor of Science, Data Science

Coursework: Python, Data Structures & Algorithms, Data Visualization, Database, SQL, Machine Learning

De Anza College, Cupertino, CA

June 2025

Associate in Science, Mathematics

Coursework: C++, Data Structures & Algorithms, Linear Algebra, Differential Equations, Multivariable Calculus

SKILLS

Languages: Python, C/C++, JavaScript

Frameworks: Pandas, NumPy, Matplotlib, Scikit-learn, SQL

Tools & Environments: VS Code, Jupyter Notebook, Git/GitHub, Excel, Notion, Eclipse, Google Colab, Linux (Ubuntu)

Web: HTML, CSS

PROJECTS

Broadband Coverage vs Health Outcomes Analysis

January 2026 – March 2026

Data Science Course Project | UC San Diego, San Diego, CA

- Integrated and cleaned large-scale datasets from FCC and CDC (county-level data) using Python (pandas).
- Conducted exploratory data analysis (EDA) and correlation analysis to identify relationships between broadband access and health outcomes.
- Implemented and evaluated models including Linear Regression, Ridge/Lasso, and Random Forest.
- Applied PCA and feature engineering to improve model performance and stability.

Development of Motion Estimation Model

August 2022 - December 2022

Undergraduate Research Project, Co-author | Sangmyung University, Cheonan, South Korea

- Developed and optimized **CNN and RL-based** models to recognize and analyze human motion patterns.
- Enhanced system accuracy and robustness by adjusting joint key points (15 to 18), improving real-time motion stability, and assisting with performance verification under various challenging conditions.
- Co-authored and presented the paper at the 2022 Korean Institute of Electrical Engineers (KIEE) Fall Conference; **published** in conference proceedings ([DBpia](#)).

LEADERSHIP & COMMUNITY INVOLVEMENT

New Community Baptist Church, Mountain View, CA

December 2024 - August 2025

Volunteer Teaching Assistant

- Supported lesson delivery for 15+ children by helping them understand class materials through one-on-one care.
- Assisted teachers in leading small-group discussions and craft-making activities.

Silicon Valley Korean School, Cupertino, CA

August 2024 - May 2025

Volunteer Teaching Assistant

- Assisted various instructors each week in a weekend program serving 1,200+ students by grading assignments, helping 20+ children stay engaged, and supporting special classes such as art and coding.

HONORS AND AWARDS

Bucheon Fantasia Robot Festival

October 2022

- **Grand Prize - Humanoid Dance Performance (Solo):** Built and programmed a humanoid robot, designing motion sequences and timing control for real-time autonomous choreography.
- **Gold Prize - Humanoid Running Warrior (Solo):** Developed robot hardware and implemented running and balance control motions for autonomous performance.

FIRA SimulCup

August 2022

- **Second Prize - Humanoid Archery (Team Leader):** Designed and programmed robot motions, integrated real-time camera aiming, and collaborated with the Arduino team to modify code.
